

## **Technical data sheet**

### Modulating rotary actuator with failsafe for ball valves

- Torque motor 10 Nm
- Nominal voltage AC/DC 24 V
- Control modulating 2...10 V
- Position feedback 2...10 V
- Deenergised open (NO)
- with 2 integrated auxiliary switches

# **Technical data**

Electrical data	Nominal voltage	AC/DC 24 V
	Nominal voltage frequency	50/60 Hz
	Nominal voltage range	AC 19.228.8 V / DC 21.628.8 V
	Power consumption in operation	3.5 W
	Power consumption in rest position	2.5 W
	Power consumption for wire sizing	6 VA
	Auxiliary switch	2 x SPDT, 1 x 10% / 1 x 1190%
	Switching capacity auxiliary switch	1 mA3 A (0.5 A inductive), AC 250 V
	Connection supply / control	Cable 1 m, 4 x 0.75 mm <sup>2</sup>
	Connection auxiliary switch	Cable 1 m, 6 x 0.75 mm <sup>2</sup>
	Parallel operation	Yes (note the performance data)
Functional data	Torque motor	10 Nm
	Torque fail-safe	10 Nm
	Operating range Y	210 V
	Input Impedance	100 kΩ
	Position feedback U	210 V
	Position feedback U note	Max. 0.5 mA
	Position accuracy	±5%
	Direction of motion motor	Y = 0 (0 V = A - AB = 0%)
	Direction of motion fail-safe	Deenergised NO, valve open $(A - AB = 100\%)$
	Manual override	by means of hand crank and locking switch
	Running time motor	90 s / 90°
	Running time fail-safe	<20 s / 90°
	Sound power level, motor	45 dB(A)
	Position indication	Mechanical
	Service life	Min. 60'000 fail-safe positions
Safety	Protection class IEC/EN	III Safety Extra-Low Voltage (SELV)
	Protection class UL	UL Class 2 Supply
	Protection class auxiliary switch IEC/EN	II reinforced insulation
	Degree of protection IEC/EN	IP54
	Degree of protection NEMA/UL	NEMA 2
	Enclosure	UL Enclosure Type 2
	EMC	CE according to 2014/30/EU
	Low voltage directive	CE according to 2014/35/EU
	Certification IEC/EN	IEC/EN 60730-1 and IEC/EN 60730-2-14
	Certification UL	cULus according to UL60730-1A, UL60730-2- 14 and CAN/CSA E60730-1:02
	Certification UL note	The UL marking on the actuator depends on the
		production site, the device is UL-compliant in
		any case
	Mode of operation	Type 1.AA.B
	Rated impulse voltage supply / control	0.8 kV
	Rated impulse voltage auxiliary switch	2.5 kV
	Control pollution degree	3
	Ambient temperature Storage temperature	-3050°C -4080°C
	Ambient humidity	Max. 95% r.H., non-condensing
		wax. 33 % I.H., HUH-CUHUEHSING

Adjustable angle of rotation with mechanical end stops.	
The actuator is overload protected, requires no limit switches and automatically stops when the end stop is reached.	
The actuator has one auxiliary switch with a fixed setting and one adjustable auxiliary switch. They permit a 10% or 1190% angle of rotation to be signaled.	
<ul><li>Connection via safety isolating transformer.</li><li>Parallel connection of other actuators possible. Observe the performance data.</li></ul>	

Safety	Servicing	maintenance-free	
Weight	Weight	2.3 kg	
Safety notes			
	conditioning syste	een designed for use in stationary heating, ventilation and air- ms and must not be used outside the specified field of application, aft or in any other airborne means of transport.	
	or aggressive gas	n: only possible in case that no (sea) water, snow, ice, insolation es interfere directly with the actuator and that is ensured that the s remain at any time within the thresholds according to the data	
		pecialists may carry out installation. All applicable legal or ation regulations must be complied during installation.	
		nly be opened at the manufacturer's site. It does not contain any eplaced or repaired by the user.	
	Cables must not be removed from the device.		
		ns electrical and electronic components and must not be disposed of the second se	
	supply voltage or	integrated in the actuator are to be operated either on power at safety extra-low voltage. The combination power supply voltage oltage is not permitted.	
Product features			
moves the valve to the operating position		ected with a standard modulating signal 010 V. The actuator he operating position at the same time as tensioning the return turned back to the fail-safe position by spring force when the errupted.	
Simple direct mounting	Simple direct mounting on the ball valve with only one screw. The mounting orientatio in relation to the ball valve can be selected in 90° steps.		
Manual override	Manual override By using the hand crank the valve can be operated manually and engaged wind locking switch at any position. Unlocking is carried out manually or automatical applying the operating voltage.		
Adjustable angle of rotation	Adjustable angle of rotation with mechanical end stops.		
High functional reliability	High functional reliability The actuator is overload protected, requires no limit switches and automatically s when the end stop is reached.		
Flexible signalization		e auxiliary switch with a fixed setting and one adjustable auxiliary a 10% or 1190% angle of rotation to be signaled.	
Electrical installation

Notes

NRF24A-SR-S2-O

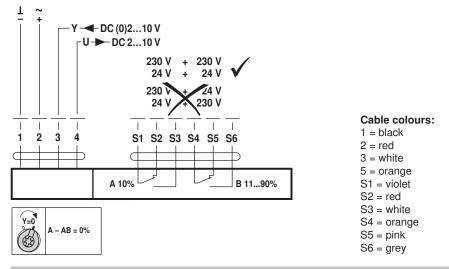

**Technical data** 

### **Electrical installation**

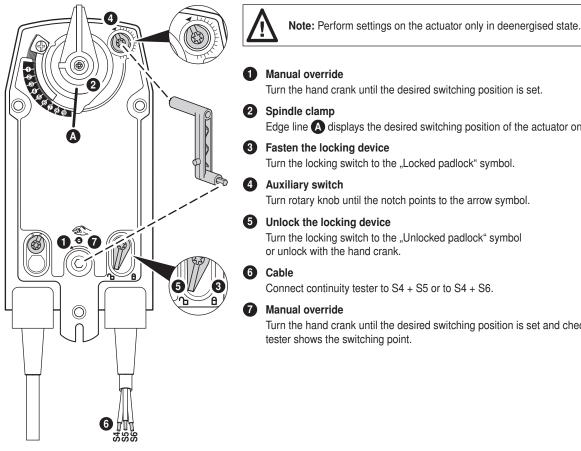

#### Wiring diagrams

AC/DC 24 V, modulating

#### **Operating controls and indicators**

#### Auxiliary switch settings

Turn the hand crank until the desired switching position is set.

Edge line (A) displays the desired switching position of the actuator on the scale.

Turn the locking switch to the "Locked padlock" symbol.

Turn rotary knob until the notch points to the arrow symbol.

Turn the locking switch to the "Unlocked padlock" symbol

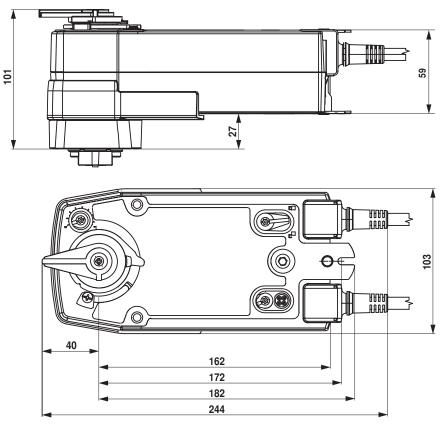

Turn the hand crank until the desired switching position is set and check whether the continuity

Rotary actuator fail-safe, modulating, AC/DC 24 V, 10 Nm, with 2 integrated auxiliary switches
